celduc® relais

AC-55a category

AC-55a : Switching of electric discharge lamp controls

Overload currents: Id =10xIn during 10ms

Overload voltage : U = 1.1 up to 2x Un

precautions :

**use 400VAC SSRs on 230VAC lines**

(when there is a capacitor at the input of the load used for EMC)

Zero cross SSRs

SK/XK range

SC8 range

SV8
